

## AIT Trip Advisor Questionnaire (Responses)

Timestamp	What is your first impression after visiting our website?	Is our system useful to you?	What do you think of our web design ?	Is our website well-organized?	After you used our system, do you have any suggestion/complain for our website?
11/20/2014 3:01:53	very nice	yes	good	yes	I would like to suggest one thing about your website is that it is very nice if you can add price more accurate than now and more places in your service page.
11/23/2014 20:21:05	Impression is just moderate. Frankly speaking, now very good	It may be useful for normal person. Try to add options for disable person i.e. accessibility options	web design is too simple, try to make it a bit sophisticated. Incude predefined routes, buttons for routes. User just has to click the destination not to write it.	Can't prescribe organization. There is nothing too much in that. [1]	<ol style="list-style-type: none"> <li>1. Try to make is accessible by disable people.</li> <li>2. Make is a bit sophisticated.</li> <li>3. Add buttons for predefined routes.</li> <li>4. If you can add wizard for route instead of statically defining routes by a user then it will be fine.</li> <li>5. Add "word of mouth" portion for routes [2]</li> </ol>
